

# REIMAGINE **THE FUTURE** OF HIGHER EDUCATION

**EOH**

SOLVE

Courageously . Exponentially . Together

**Ziaad Suleman**

Group Chief Commercial Officer, EOH

SA Chair 4IR BRICS, Chair Digital Economy PPGI & Exec.DWA (Presidential Commissions)

# REIMAGINE

## THEMES TO BE COVERED

- Drivers of Digital Transformation
- Barriers to Digital Transformation
- How can we effect change
- Becoming a more efficient (Smart) Campus
- Roadmap to a digitally transformed campus
- Paving the way to education 2030 and the campus of the future

# REIMAGINE

## DRIVERS OF DIGITAL TRANSFORMATION

- Student enrolment – increase to 1.5 million by 2030\* in SA
- Growing and varied competition on a global scale – constant disruption
- Changing student expectations and changing operational models (student and institution)
- Focus on personalisation, self-service, automation, customer service
- Mobile, Cloud, Data & AI, Security, Robotics, Blockchain ....
- Skills 4IR : demand led (now and the future) – STEM + solution mindset – agile curriculum  
= agile teachers and agile leaders = future

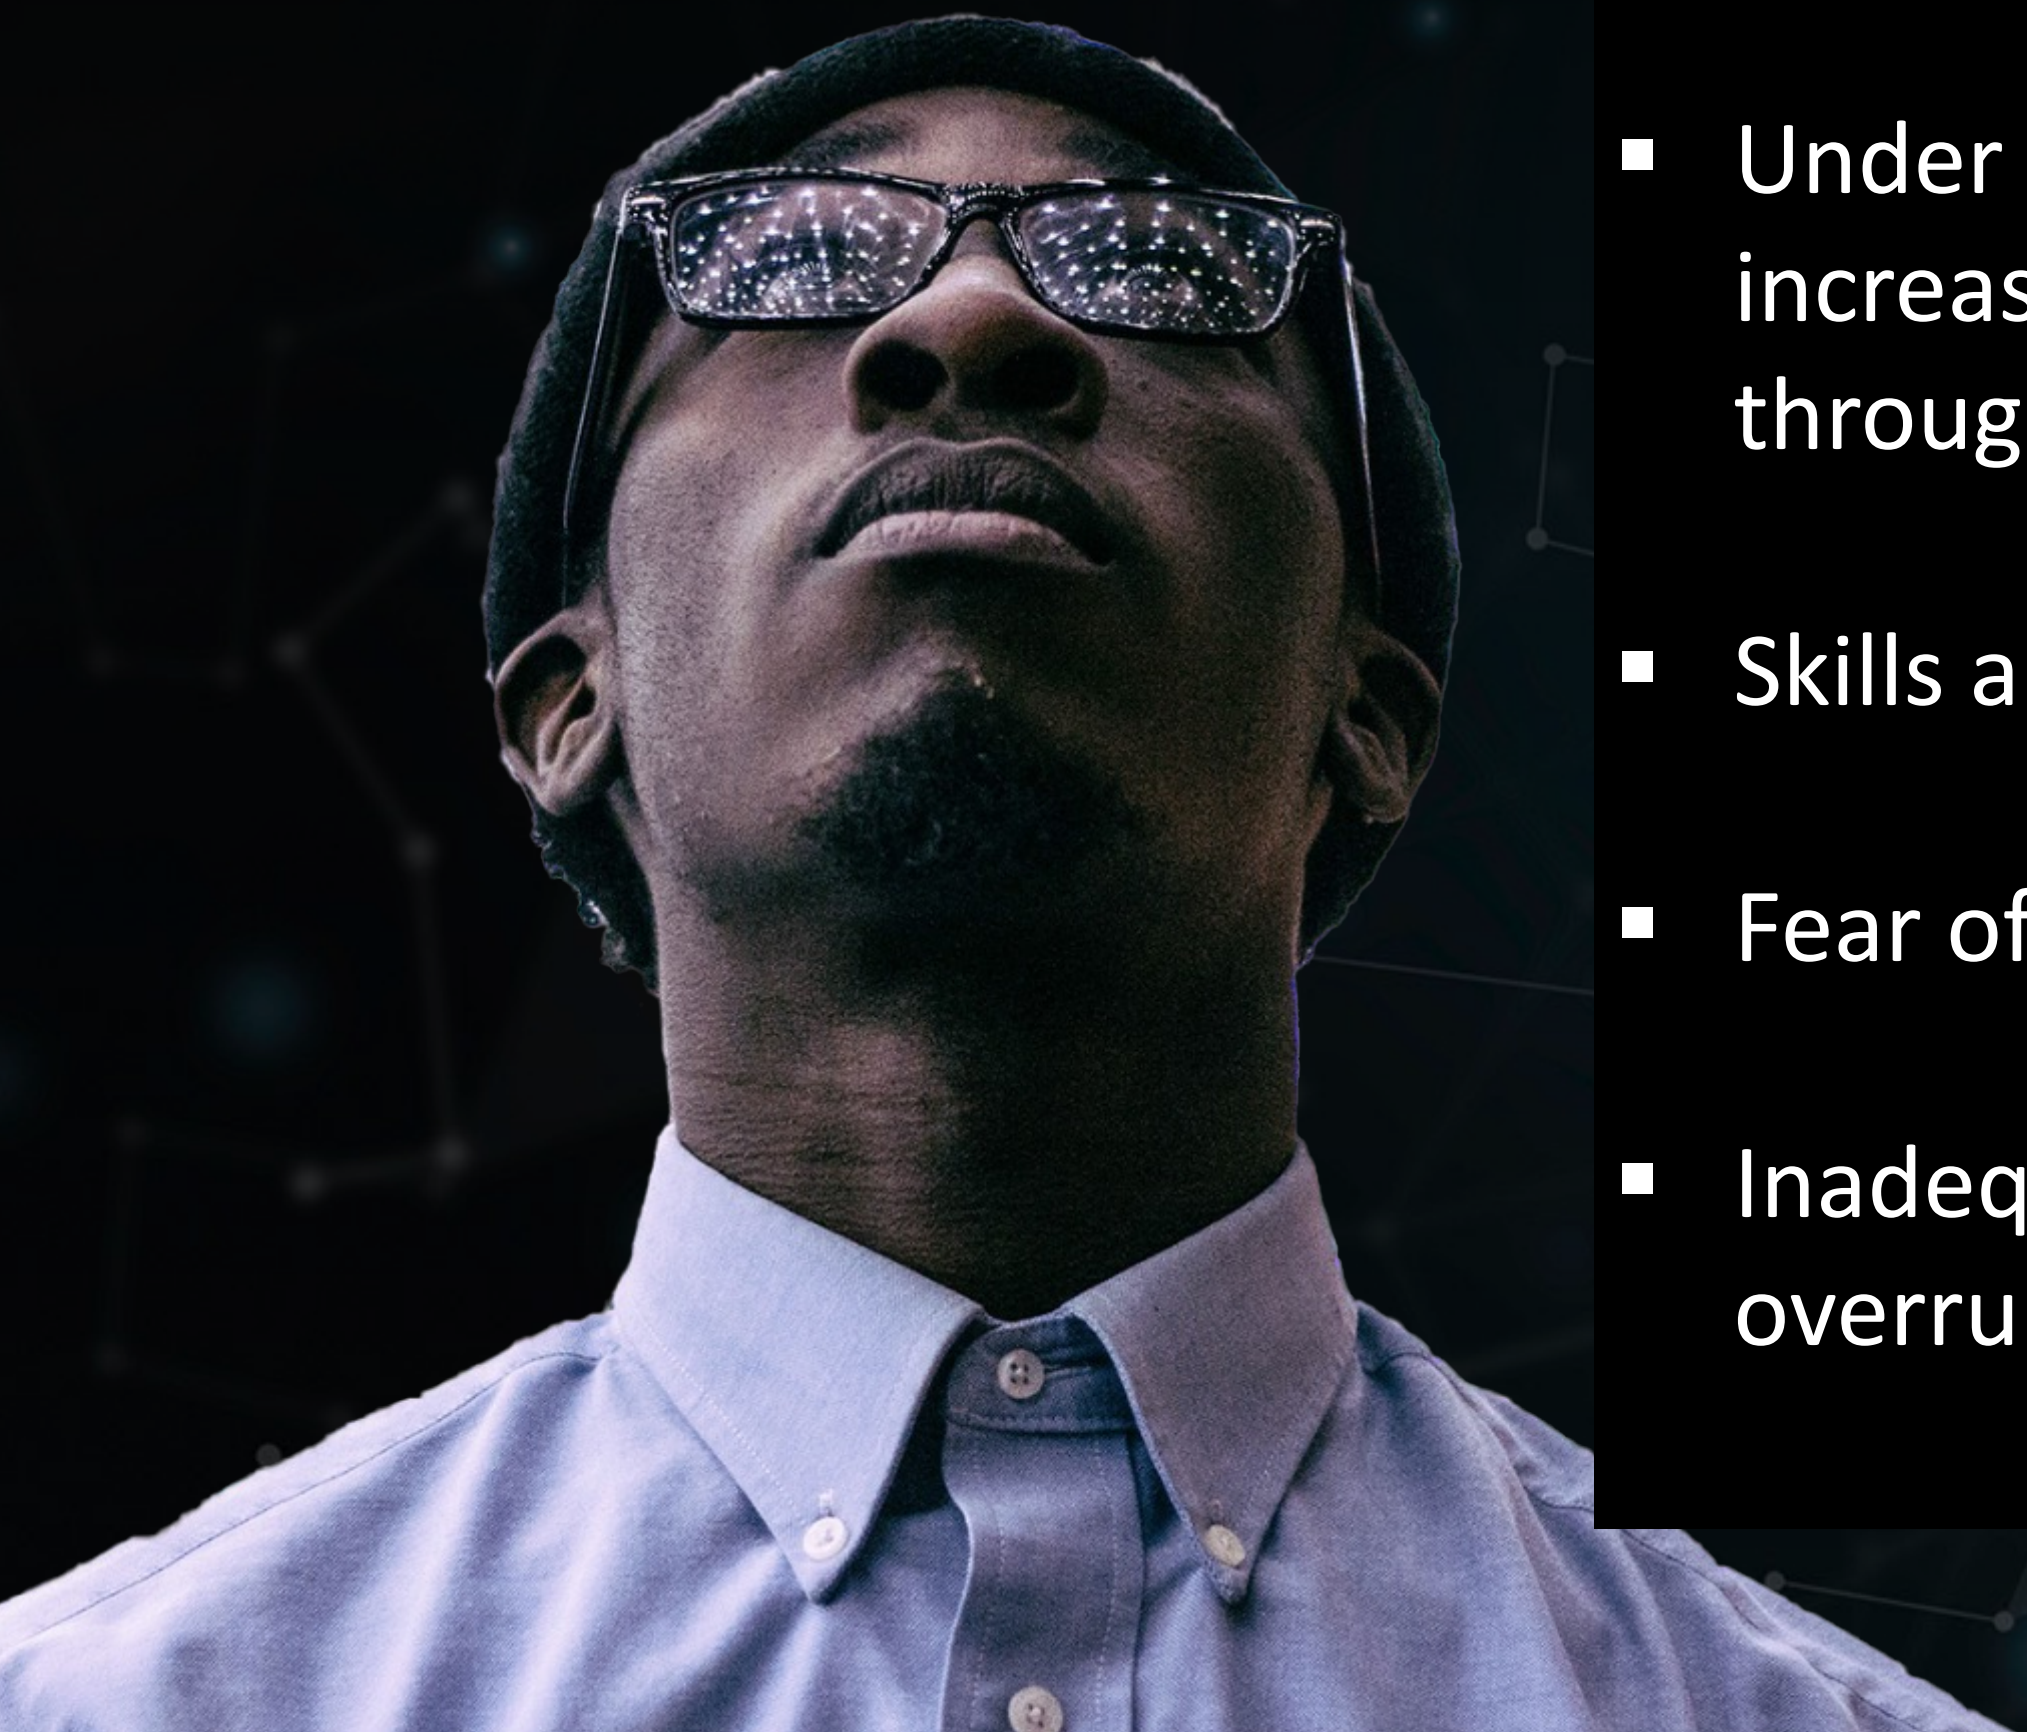

# REIMAGINE

## BARRIERS TO DIGITAL TRANSFORMATION

- Leadership pivot and embracing change – starts with one step including strategic vision
- Under - investment in critical infrastructure – legacy infrastructure increases risk and cost whilst reducing efficiency and optimisation through disparate systems and no integration
- Skills and capacity
- Fear of the unknown and job security
- Inadequate IT Governance resulting in project delays and cost overruns – automated process and policies key to success

# REIMAGINE

## HOW CAN WE EFFECT CHANGE?

• Leverage technology to provide hybrid learning curriculums with deep experiential learning

• Blended online and offline learning capabilities to cater to a broader range of students.

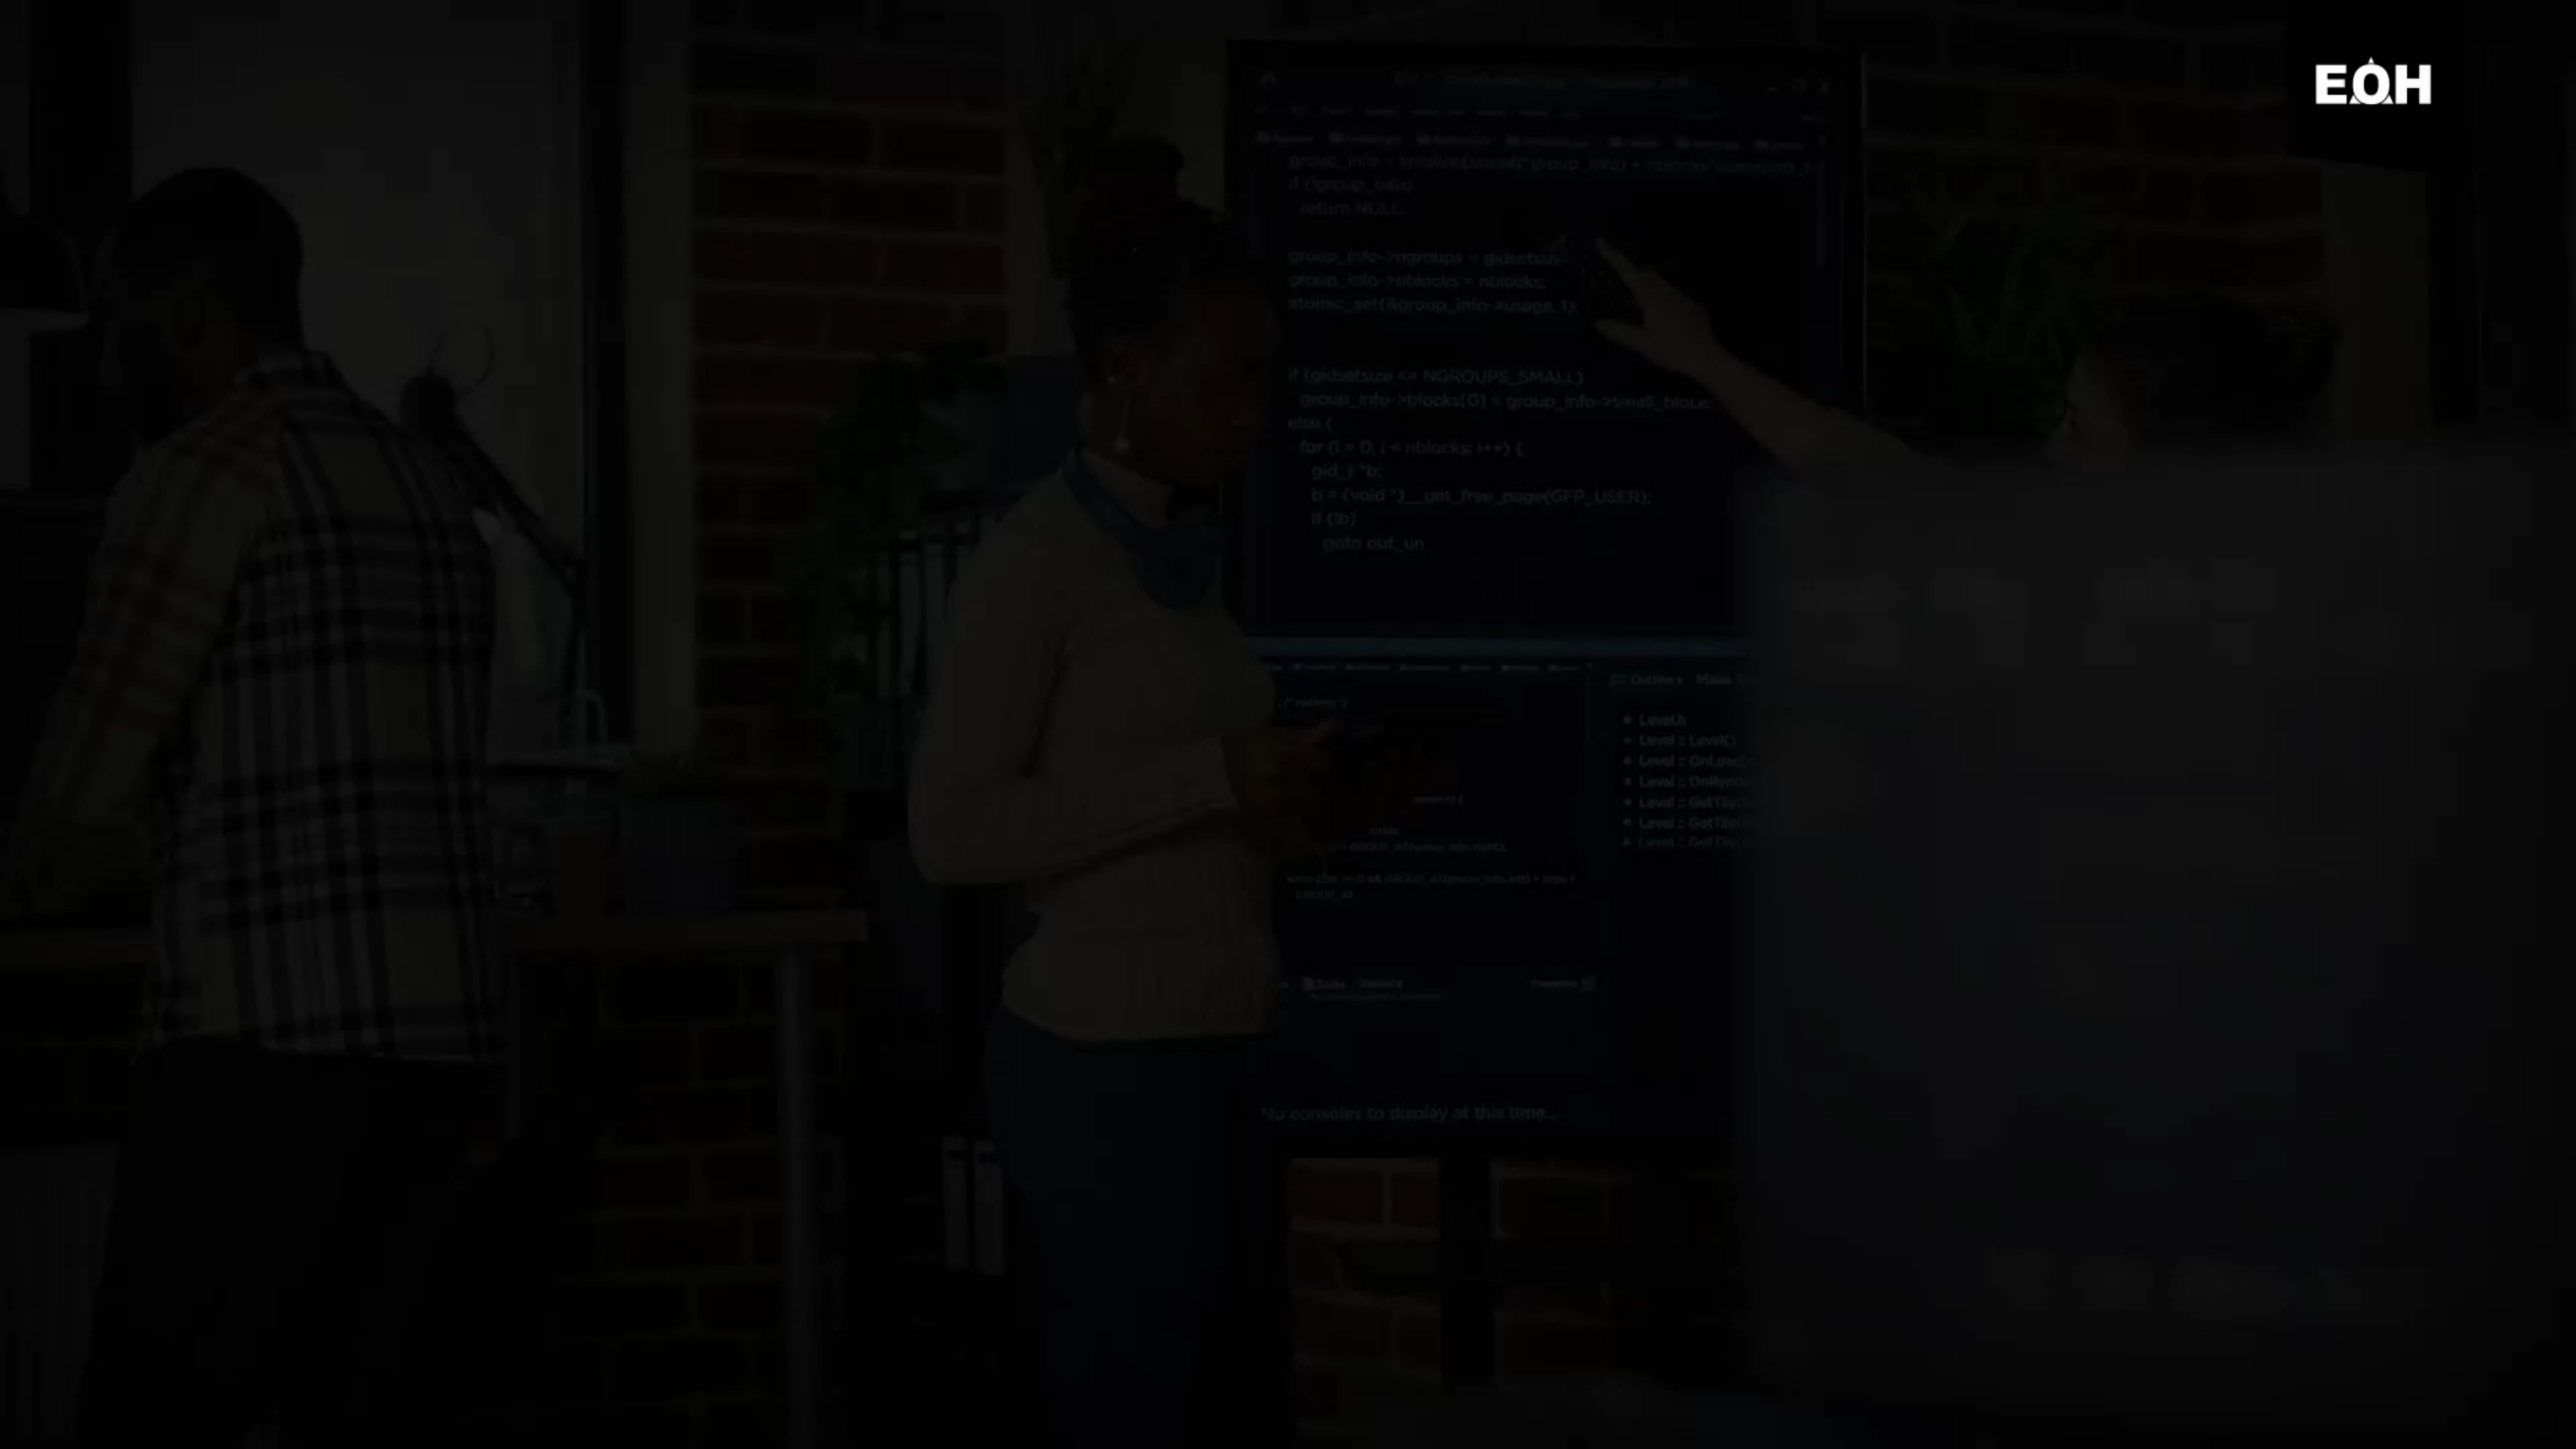

• Smart bots open the possibility of personalised learning at scale

• Staff trained to deliver knowledge in an effective manner using technology

Adoption of digital enabling technologies with purpose

```

group_info = smallgroupinf(group_info) + "blocks" + "summary";
if (group_info)
    return NULL;

group_info->ngroups = gidsetsize;
group_info->nblocks = nblocks;
atomic_set(&group_info->isaga, 1);

if (gidsetsize <= NGROUPS_SMALL)
    group_info->blocks[0] = group_info->small_title;
else {
    for (i = 0; i < nblocks; i++) {
        gid_i *b;
        b = (void *) __get_free_page(GFP_USER);
        if (b)
            goto out_un;
    }
}

```

No consoles to display at this time.

# REIMAGINE

## BECOMING A MORE EFFICIENT (SMART) CAMPUS

- **Smart access control – facial recognition and booking access to manage workspaces**
- **View, sign, send and store sensitive documents online – speed, secure and compliant**
- **Improved student engagement - paperless registration & managed course delivery – from student orientation to course documentation**
- **Data & AI = support the lecturers & tutors, learning patterns, performance modelling, automated support, attendance statistics and sentiment analysis = tailored education**
- **Simplified payments - using QR codes, smart cards and biometrics – speed and secure**
- **Physical infrastructure integrated with Digital Tech – “connecting people and buildings to data, information, processes, places, resources, and each other”**
- **Smart buildings - electricity efficiency and predictive maintenance**
- **Student safety**
- **Smart Campus uses virtual assistants, RPA and data analytics to: improve service, speed up processes, allow for informed decision-making and improve governance**

# REIMAGINE

## ROADMAP TO A DIGITALLY TRANSFORMED CAMPUS

Leverage Data

Obtain a 360-degree view of your students

Prioritise cybersecurity

Invest in cloud-based infrastructure

Invest in smart infrastructure & tech – gain efficiencies & cost-savings

Culture shift

# THE FUTURE OF HIGHER EDUCATION IS HERE
